Mr. John Gormley (Green Party) (Minster of Environment, Local Government and Heritage)
Leinster House,
Kildare St,
Dublin 2.

Dear Minister Gormley,

I welcomed the Green Party's inclusion of a ban on fur factory farming in the current Programme for Government. Please do all you can to ensure that this becomes law as soon as possible and that the phase out time is reduced to as little as possible. I believe that fur factory farming is one of the biggest animal welfare/rights issues in Ireland.

I fully support the stand that fur factory farming should be outlawed immediately on the grounds of cruelty to animals and rights violations. Keeping an animal trapped in a small wire mesh cage for their entire life until they are killed by anal electrocution or gassing is not acceptable and should stop as soon as possible. Pretending our weak animal welfare laws are appropriate will not ensure this exploitation ceases. Only outlawing fur factory farming will. Please give this matter your full attention. I will look forward to your reply.

Yours Sincerely,

Mr. Brendan Smith (Fianna Fail), Minister for Agriculture, Food and Fisheries
Leinster House
Kildare St
Dublin 2.

Dear Minister Smith,

I am disappointed in Fianna Fail's support of fur factory farming up to date but I welcome the current Programme for Government which promises to phase out fur factory farming. I now ask that Fianna Fail ensure this becomes law as soon as possible with a minimum of a phase out time period. There is no reason why fur factory farming still continues in Ireland. As minister of Agriculture it is at your discretion to revoke and to not issue licenses to fur factory farms. This is your responsibility. You can stop this now.

I fully support that fur factory farming should be outlawed on the grounds of cruelty to animals and rights violations. Keeping an animal trapped in a small wire mesh cage for their entire life until they are killed by anal electrocution or gassing is not acceptable and should end immediately. Pretending our weak animal welfare laws are appropriate will not ensure this exploitation ceases. Only outlawing fur factory farming will. Please give this matter your full attention. I will look forward to your reply.

Yours Sincerely,
